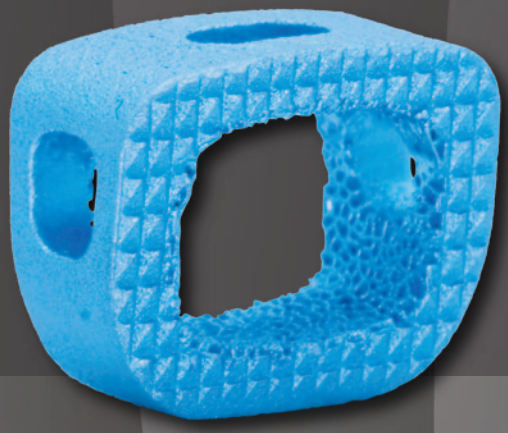
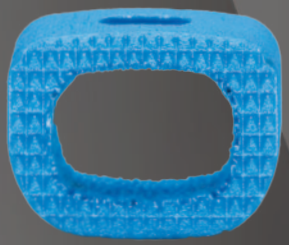
Vytex NF

CERVICAL SYSTEM



*Vytex NF is a spinal device that is **implanted in the intervertebral body space via an anterior approach** to improve stability of the spine while supporting fusion. Components are offered in different shapes and sizes to meet the requirements of the individual patient anatomy. Made from additively manufactured titanium alloy (Ti-6Al-4V ELI).*



MAXIMIZE PATIENT OPTIONS

Includes various footprints to provide maximum flexibility in meeting all patient needs.

PROMOTE LONG-TERM STABILITY

Can be used to promote long term stability when used with supplemental fixation.

SUPPORT BONE IN-GROWTH

The design and porous structure improves adhesion to vertebral body endplates to support bone-in-growth when used with allogenic bone graft and/or autograft to facilitate fusion.

ENABLE LESS PATIENT TRAUMA & SURGICAL TEAM EFFICIENCY

Simple insertion methods and easy-to-use instrumentation create less trauma for the patient and save valuable time for the surgical team.

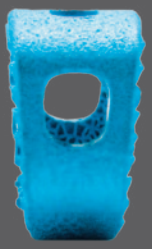
Vytex NF

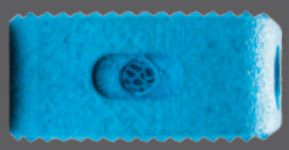
CERVICAL SYSTEM

INDICATIONS FOR USE

The Vytex NF cervical system is **indicated for intervertebral body fusion of the spine in skeletally mature patients who have had at least six months of non-operative treatment**. The device system is designed for use with allogenic bone graft comprised of cancellous and/or corticocancellous bone graft and/or autograft to facilitate fusion. One device is used per intervertebral body space.

The Vytex NF cervical system is **intended for use at either one level or two contiguous levels in the cervical spine, from C2 to T1, for the treatment of degenerative disc disease (DDD) with up to Grade I spondylolisthesis**. DDD is defined as back pain of discogenic origin with degeneration of the disc confirmed by history and radiographic studies. The Vytex NF cervical system is **intended to be used with supplemental spinal fixation systems** cleared for use in the cervical spine.





CERVICAL STANDARD SIZES								
Lordosis	Height (mm)							
0˚	5	6	7	8	9	10	11	12
5˚	5	6	7	8	9	10	11	12
10˚	-	6	7	8	9	10	11	12
15˚	-	-	7	8	9	10	11	12
